

WORKSURFACE PRIVACY SCREEN

CREATE PERSONAL SPACE

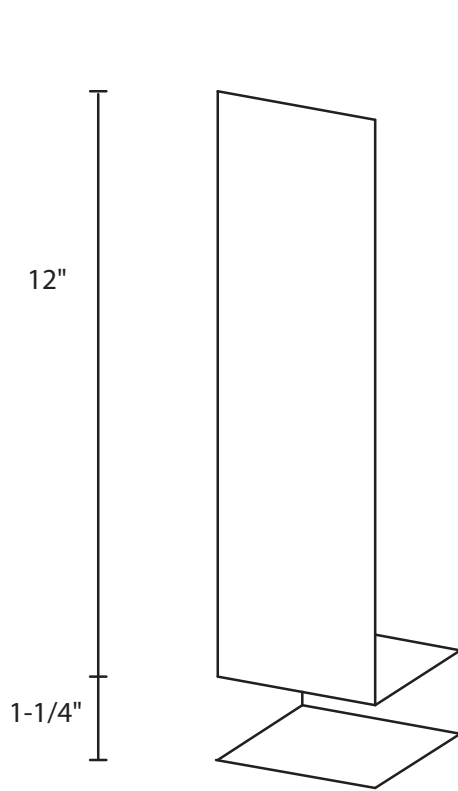

The Worksurface Privacy Screen (WPS) is a double sided panel that mounts to the back or sides of a free-standing worksurface or table. This is a simple, inexpensive and easy to install product that adds a measure of privacy to an open area.

The WPS is tackable, making it a perfect place to attach phone lists, personal photographs, notes, etc. It is also excellent at keeping pens and pens from rolling off the edge of the desk!

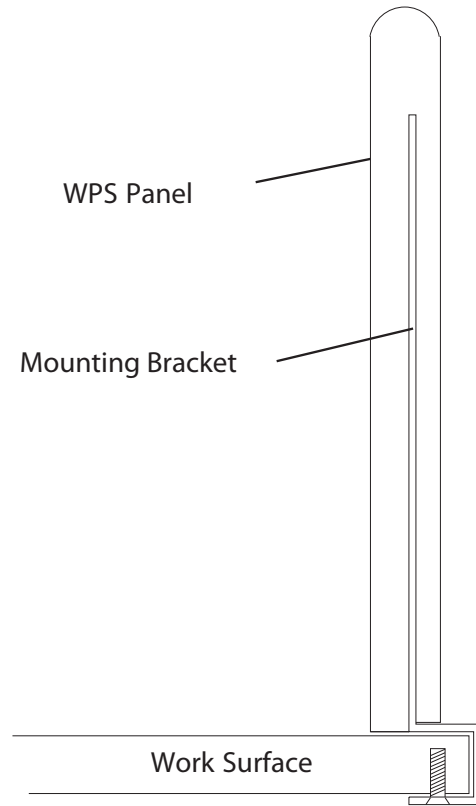

Available up to 72 inches wide, the WPS comes in a 14 or 23 inch heights. A small notch can be cut into the bottom center of the unit for wire management.
