

3 Dimensional Ridge Panels

Eight 2 x 2 panels in 3 different configurations

Make your walls pop out at you with our 3 Dimensional Ridge Panels!

Fabricated from our standard APS-3 acoustic panels, we have added a diagonal ridge coming out of the face to give the panels a third dimension and a two-tone appearance when light shines across them.

The panels measure 1 $\frac{7}{8}$ " thick at the peak of the ridge, flowing back down to 1" at the edges. The edges are slightly radiused to allow clean butt joints between panels.

Covered with standard or non-standard fabrics, the panels typically come in 1'x1', 2'x2' and 4'x4' sizes. Custom sizes are available.

1x1's and 2 x 2's ship in sets of 4, 4 x 4's ship in sets of 2.
